High load capacity

Radon Gas Springs for Furniture Solutions

The radon Gas Spring is a high-quality bed lift piston developed for the furniture industry, combining durability and smooth performance. With its **dual-component protective coating** and **nitrided steel rod**, it offers excellent **corrosion resistance**, **extra hardness**, and long-lasting reliability. The precision sealing system and sealed nitrogen chamber ensure **silent, maintenance-free operation** with consistent lifting force, making storage beds and lift-up furniture effortless to use.

Built for strength and endurance, the radon Gas Spring is tested for thousands of cycles and available in various **force ratings** to match different mattress and bed weights. Its **easy installation**, compatibility with standard mechanisms, and proven durability make it the ideal choice for modern furniture, delivering both **comfort and long service life**.

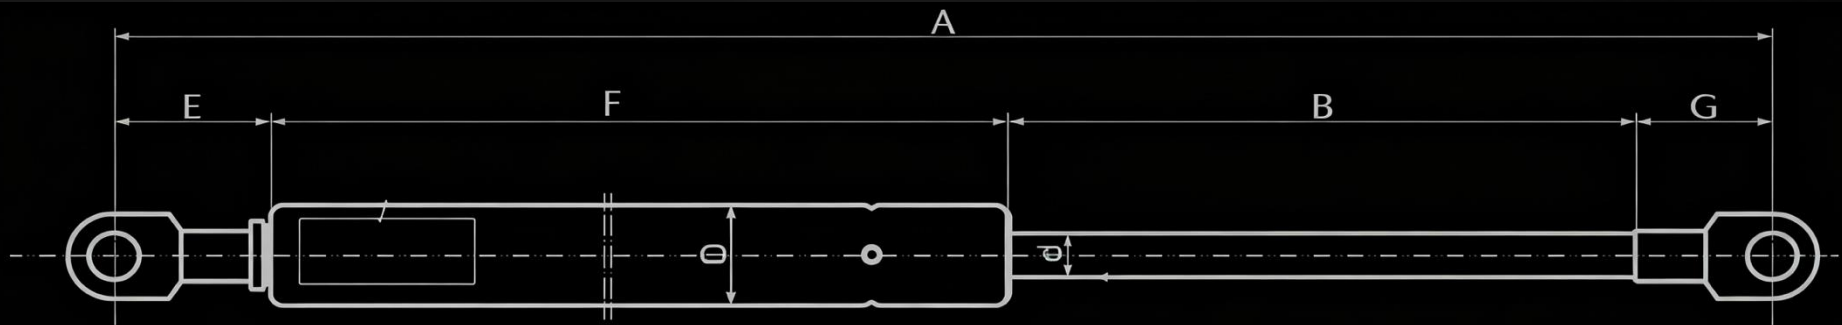

Radon Gas Springs

Technical Data

It is available of setting up of the newton value from 250N to 1200N according to customer expectation. And also revising of the total length and/or stroke length or total diameter of the main tube specified with «F» by customer's technical expectations

Code	Description	Standart (mm)	Optional (mm)
A	Total Length	360	Available
B	Stroke Length	150	Available
E	Connection Part-1	20	Available
F	Tube Length	165	Available
G	Connection Part-2	30	Available
